Lerman Non-Invasive Halo  Cervical Thoracic Orthosis

A clinically proven orthosis for cervical stabilization and acute non-invasive cervical spine care.*

**Non-Invasive Halo Advantages***
- Provides cervical stabilization with fewer patient complications
- Secure and comfortable fit
- Minimizes patient positioning to reduce risk of further injury
- Improves patient tolerance
- Hypoallergenic facemask materials
- Can don in supine position with no rolling of patient

**Indications**
- Cervical spine immobilization for neurologically intact non-displaced or minimally displaced fractures
